Indicative demo report only. Synthetic portfolio data — not an official bank or government credit decision. Confirm scheme details and subsidy amounts at your bank or CSC.

Farmer summary

Name / ID	Farmer
State	KA
District	KA-North
Crop	Rice
Season	Kharif
Land (ha)	2.0
Soil	Red
Rainfall (mm)	1100.0
Irrigation	Canal
Loan (₹)	150000
Annual income (₹)	280000
Existing debt (₹)	30000

Risk assessment

Risk level	Low
Risk score	0.15 (15/100)

What drove this score (SHAP)

Factor	Impact	Explanation
Annual farm income	-25 pts	Farm income provides a stronger buffer for repayment
Rainfall (mm)	-4 pts	Rainfall conditions helped lower repayment risk
Loan amount	+3 pts	Loan size is high relative to what similar farms typically carry
Land size (ha)	-2 pts	Land size supported a more comfortable loan profile
District	+2 pts	Local district conditions raised risk vs baseline

Advisory

Namaste ji. Your FarmCredit risk level is Low. Main pressure points: Loan size is high relative to what similar farms typically carry; Local district conditions raised risk vs baseline. What is helping: Farm income provides a stronger buffer for repayment; Rainfall conditions helped lower repayment risk. Next steps: match crop and irrigation to local rainfall, keep loan size close to expected income, and ask your bank/CSC about KCC, PM-KISAN, and PMFBY eligibility. Figures here are indicative for this demo — confirm locally.

Scheme checks (indicative)

- PM-KISAN — income support for eligible landholding farmers (verify eligibility locally).

- Kisan Credit Card (KCC) — working-capital credit for crop and farm needs.
- PMFBY — crop insurance against weather and yield shocks (check crop/season coverage).
